Our Project:

As third year students in Varsity College, we are required to create an app, with the option to also create a website, for an NPO. This is our way of giving back to the community while also exposing ourselves to potential employers.

We chose the Umbilo Temple as our NPO since one of our members is does already donate and is familiar with the temple and their initiatives. We are aware of some of the issues regarding tourism and we hope that our website and app will publicize the temple.

Meet the Team:

Bela Jyoti Premchund – Project Manager

Sohum Singh – Head Programmer

Kayla Shunmugam – Documentation

Kimera Pillay – System Analyst

Mohammed Tehzeeb Govind – Backend Developer

Kayden Padayachee – Frontend developer

Altaaf Ally – Frontend and Backend Developer

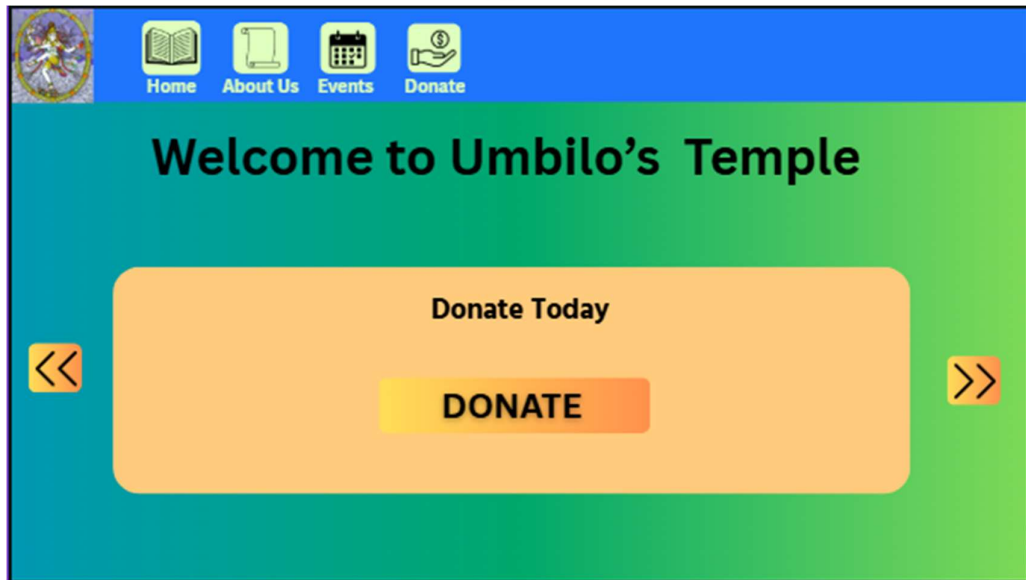

(The frontend and backend developers are the members responsible for creating the website and app)

Requirements:

Website features:

The following features will create your website:

- Home Page:
For the home page, it will include an introduction for the Umbilo Temple, contact information, and a button to redirect the user to the donations page. Users will also use the contact information to leave comments regarding events or to request a booking for a prayer at the temple.

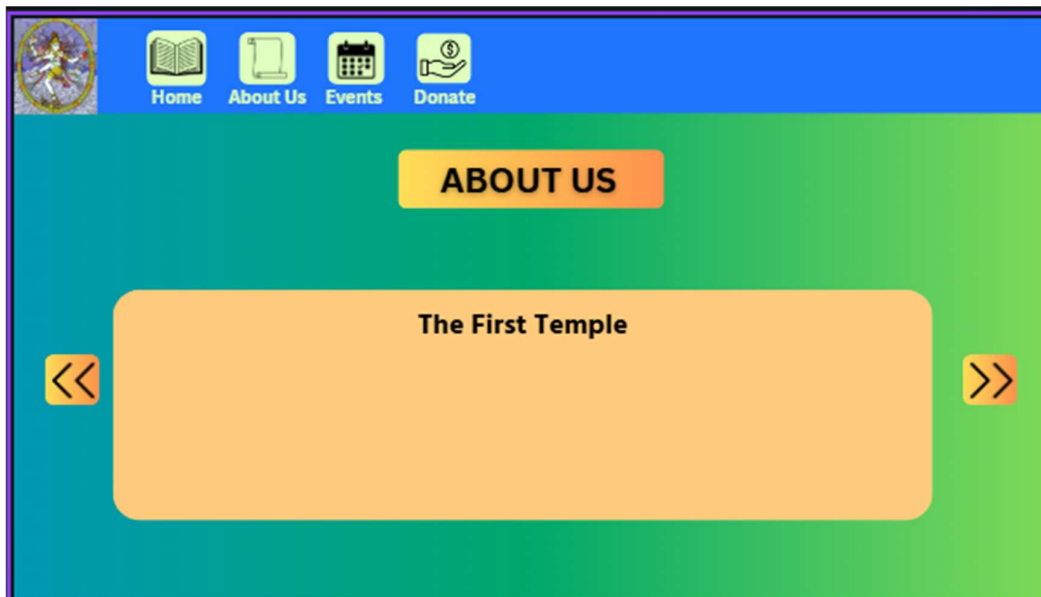

- An 'About' page

On this page, users will find everything about the Umbilo Temple, from the history of the first temple all the way to the renovations done in 2024.

- Initiatives:

On the About Us page, users will also be able to view all the current initiatives the Umbilo Temple is currently involved in, sure as the Golden Gateway School.

We would ensure that users can scroll through to find the history in chronological order.

- Donations page:

We will also include a donations page so anyone with access to the website can donate an amount of their choice. Users will also receive a receipt stating they have donated.

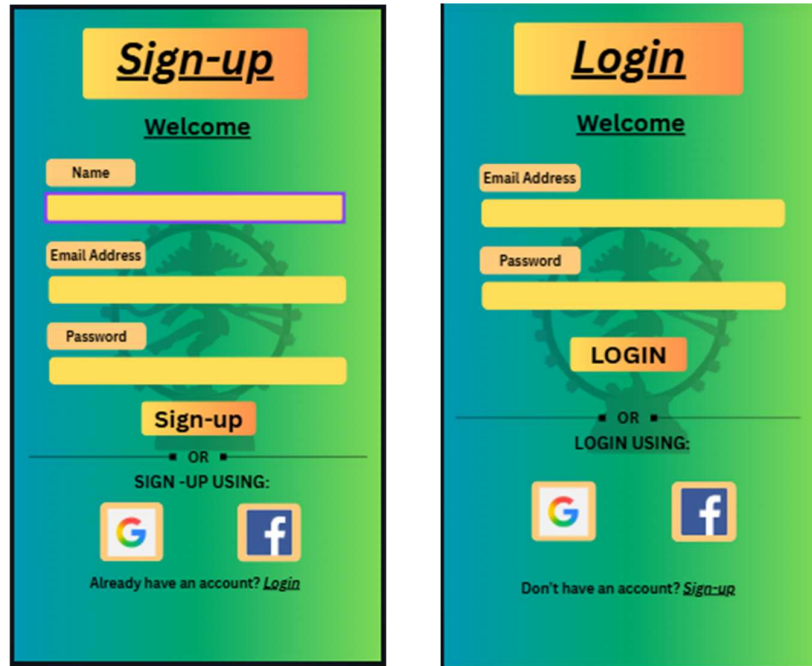

- Events page:

For the events page, users would be able to see the dates and times for each upcoming event.

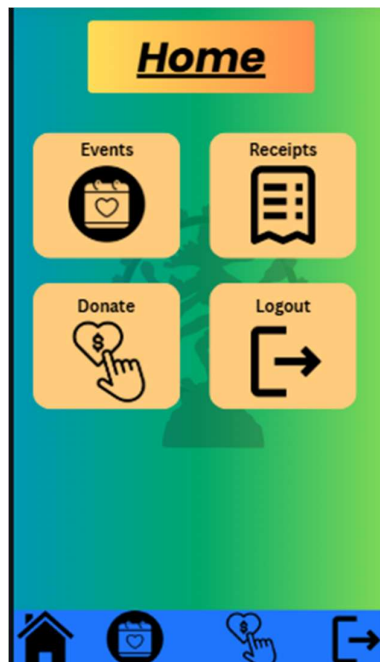

App features:

- Authentication

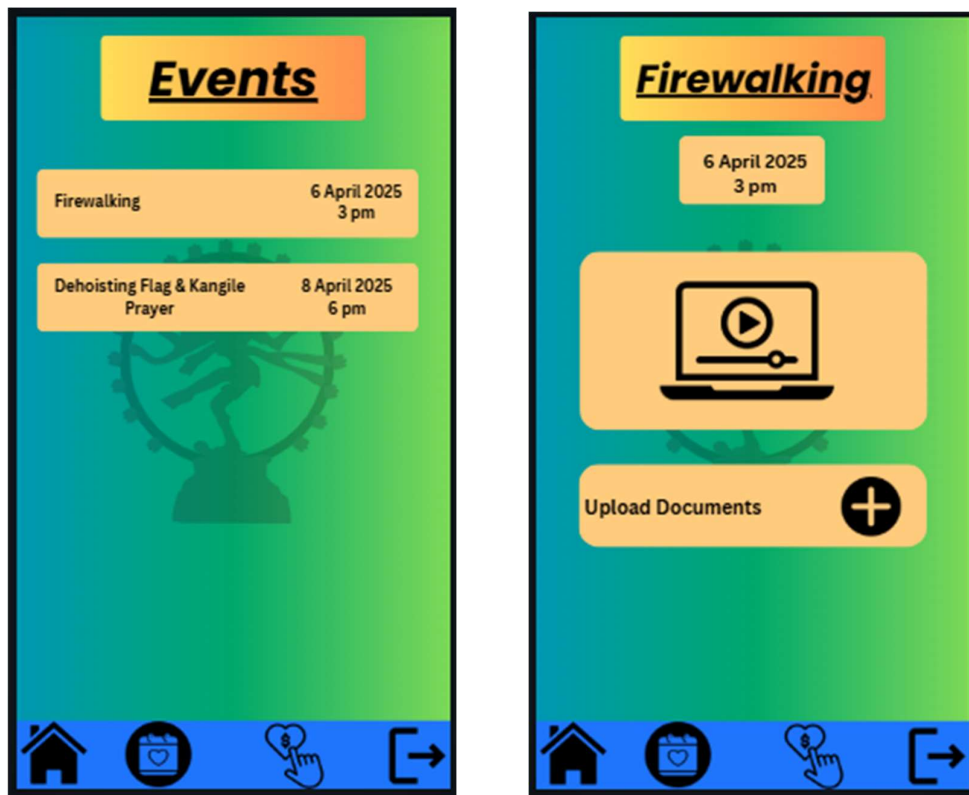

Users would need to sign up using their email address and password. This will be beneficial as some features, such as uploading videos, will only be accessed by committee members.

Once users have logged in, they will be redirected to the home page.

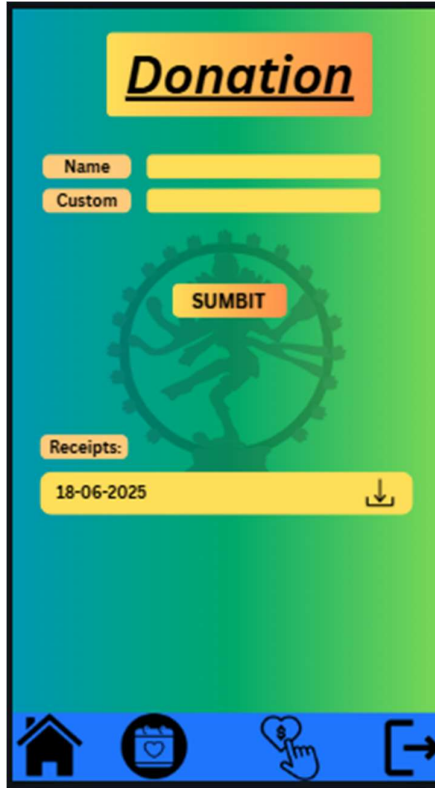

- **Events page**
Users will get notifications when there are events, such as firewalking. On the app, users will be able to see the date, time, requirements and dress code for the event.
For past events, users would be able to see all videos and images that were taken.
- **Uploading documents and videos**
We will ensure that only admin (committee members) can upload documents (e.g. event invitations) and videos and images from the event.

- A donations page

We will also include a donations page in the app, making it easier for anyone to make a donation. Their receipts will be stored, and users can download them when they wish.

What we need:

- Contact Permission:
For the website, we are plan on including the contact details for some of the committee members, such as the Chairperson and Guru Dhanasargaren. We require permission to display this information on our website; this information will be made public and can be seen by anyone that has access to the website. We would also like the information (their names and email addresses) of any member that would be considered as an Admin user, such as committee members. This will be used for the app, as only Admin users will be able to upload documents.
- History and Initiatives:
To ensure that we add accurate information about the history of the Umbilo Temple on the website, we would need the full history of the Umbilo Temple and the initiatives the NPO have been involved with, from the first temple to current.

- Logo:

While designing the mock-ups for the website and the app, we could not find the logo for the NPO. We would require this for the website and app background and the app icon. If there is a logo for the NPO, please can you send it to us. I have added the contact information for some of our members on the cover page of this document.

Conclusion:

We are grateful for this opportunity and hope that our app and website will be beneficial to the NPO. If there are any concerns regarding this project at any time, we will make changes and we will provide constant updates.
